Hiring Manager

J.P. Morgan Chase & Co.

Dear Hiring Manager,

I am writing to express my interest in opportunities within your esteemed organization. With a background in finance, analytics, and technology, along with hands-on experience in product innovation and data-driven decision-making, I am eager to bring my skills to a forward-thinking team like yours.

In my current role as Deputy Manager – Innovation at Shriram Life Insurance, I have led several high-impact initiatives, including the automation of workflows using Alteryx, integration of blockchain in claims processing, and development of data-driven insurance products. These efforts improved operational efficiency and enabled strategic expansion into untapped markets. My work involves extensive use of Alteryx and advanced Excel, supported by strong collaboration across teams.

I hold an MBA in Finance & Analytics from NMIMS Hyderabad and a B.Tech in Computer Science from SRMIST. I've completed live projects in equity research and valuation with Finlatics, and published a research paper on forecasting in Springer. My passion lies in using analytics to uncover insights that drive business performance, improve customer experience, and support innovation.

I am particularly drawn to **J.P. Morgan Chase & Co.** for its reputation in fostering innovation, embracing technology, and maintaining high standards in financial services. I am confident that my blend of technical and analytical capabilities can contribute meaningfully to your team.

Warm regards,

Anubhav Soam
